Compliments of

ALLEN C. BEACH,

Secretary of State.

CENSUS

Card

OF THE

STATE OF NEW YORK

FOR

1875.

COMPILED FROM THE ORIGINAL RETURNS

UNDER THE DIRECTION OF THE SECRETARY OF STATE,

BY

C. W. SEATON,
SUPERINTENDENT OF THE CENSUS.

ALBANY:
WEED, PARSONS AND COMPANY, PRINTERS.

1877.

TABLE OF CONTENTS.

INTRODUCTION	vii
--------------------	-----

TABLES.

I. Population.

Table 1 — Aggregate Population, by Counties, at each of the Censuses from 1790 to 1875.....	PAGE. 2
Table 2 — Population, by Counties, as Native and Foreign-born, at each of the Censuses from 1845 to 1875.....	3
Table 3 — White Population, by Counties, at each of the Censuses from 1790 to 1875	4
Table 4 — Colored Population, by Counties, at each of the Censuses from 1790 to 1875.....	5
Table 4a — Showing the number of Chinese, Japanese and Indians, enumerated at the Census of 1875	13
Table 5 — Increase of the Population, between the Censuses of 1870 and 1875, by Counties.....	6
Table 6 — Rate of Increase, per cent, of the Population of each County, in the interval between the Censuses of 1870 and 1875. Counties arranged with reference to the rates of Increase, per cent	7
Table 7 — Increase of the Aggregate Population between each of the Censuses, 1790-1875	8
Table 8 — Increase of the White Population between each of the Censuses, 1790-1875.....	8
Table 9 — Increase of the Colored Population between each of the Censuses, 1790-1875.....	8
Table 10 — Increase of the Native Population between each of the Censuses, 1845-1875.....	8
Table 11 — Increase of the Foreign Population between each of the Censuses, 1845-1875.....	8
Table 12 — Showing, by Counties, Cities and Towns, the Population distinguished as Rural and Urban and Suburban, at the Censuses of 1865 and 1875	9
Table 13 — Showing, by Counties, the Population distinguished as Rural and Urban and Suburban, at the Censuses of 1865 and 1875, with the increase per cent of each class during the interval.....	13
Table 14 — Showing, by Counties, Towns, and Wards of Cities, the Population at the Census of 1875, in the Aggregate, and as Native and Foreign-born, as White and Colored, and as Male and Female; also the number of Males of the Voting and Military Ages, of Persons of the School Age, of Aliens, of Land-owners, and of Illiterates	14
Table 15 — Showing the Population of the twenty-four Cities at the Census of 1875, in the Aggregate, and as Native and Foreign-born, as White and Colored, and as Male and Female; also the number of Males of the Voting and Military Ages, of Persons of the School Age, of Aliens, of Land-owners, and of Illiterates..	28
Table 16 — Showing, by Counties, the number of Males of Voting Age, and the number of Males of Voting Age who are not Aliens; the number of votes cast for electors at the Presidential election in 1876; also the proportion of votes cast to the number of males of voting age, and to the number of males of voting age who are not aliens	28
Table 17 — Showing, by Counties, the Population at the Census of 1875, in the Aggregate, and as Native and Foreign-born, as White and Colored, and as Male and Female; also the number of Males of the Voting and Military Ages, of Persons of the School Age, of Aliens, of Land-owners, and of Illiterates.....	29

II. Birthplaces of the People.

Table 18 — Showing how many of the Inhabitants of each County, Town, City and Ward, at the Census of 1875, were born in certain selected Counties, States and Foreign Countries	30
Table 19 — Showing how many of the Inhabitants of the twenty-four cities, at the Census of 1875, were born in certain selected Counties, States and Foreign Countries	263
Table 20 — Showing how many of the Inhabitants of each County and of the State, at the Census of 1875, were born in certain selected Counties, States and Foreign Countries	46
Table 21 — Ratios. Showing, on a basis of a Population of 100,000 for each County and for the State, what proportion of the Inhabitants of each County and of the State, at the Census of 1875, were born in certain selected Counties, States and Foreign Countries.....	47
Table 22 — Showing, for each County and for the State, how many of the Inhabitants of New York, at the Census of 1875, were born in each County of New York, in each State and Territory of the United States, and in each specified Foreign Country	48
Table 23 — Showing what Counties were taken as contiguous in constructing tables 18-21.....	57
Table 24 — Showing the number born in New York residing in other States, and the number born in other States residing in New York, at the Census of 1870.....	57

III. Ages of the People.

	PAGE.
Table 25 — Showing, by Counties, Towns, and Wards of Cities, and by Sex, the Ages of the Native White, the Foreign-born White, and the Colored Population at the Census of 1875	58
Table 26 — Showing, by Sex, the Ages of the Native White, the Foreign-born White, and the Colored Population of the twenty-four cities at the Census of 1875.....	178
Table 27 — Showing, by Counties and by Sex, the Ages of the Native White, the Foreign-born White, and the Colored Population at the Census of 1875	182
Table 28 — Showing, by Counties and by Sex, in Annual Intervals, the Ages of the Native White, the Foreign-born White, and the Colored Population of New York, of eighty years of age and upward, as returned at the Census of 1875.....	190
Table 28a — Showing the Ages as they appear in the returns of former Censuses, of all persons (forty-eight in number) whose names could be found in those returns, who, at the Census of 1875, were returned as one hundred years of age and upward	199
Table 28b — Birthplaces of the persons of eighty years of age and upward, enumerated in New York, at the Census of 1875.....	199
Table 29 — Summary, showing the Ages of various classes of the Total Population, at the Census of 1875.....	194
Table 30 — Ages of the Population of New York in various classes, and of each Sex in Massachusetts at the Censuses of 1870 and 1875, reduced to a basis of 100,000 persons of all ages in each class.....	197

IV. Mortality.

Table 31 — Showing the Number of Deaths returned as having occurred in each County and in the State, from each Specified Disease and Class of Diseases, during the Census year ended June 1, 1875	200
Table 32 — Showing the Number of Deaths returned as having occurred in the State during the Census year ended June 1, 1875, from each Specified Disease and Class of Diseases, with Distinction of Age and Sex.....	204
Table 33 — Showing the Number of Deaths returned as having occurred in each County and in the State during the Census year ended June 1, 1875, with Distinction of Sex and Age.....	208
Table 34 — Showing the number of Deaths returned as having occurred in the State during the Census year ended June 1, 1875, from each Specified Disease and Class of Diseases, with Distinction of Sex, and Month of Death.....	210
Table 35 — Showing, with Certain Distinctions of Race and Nationality, the Number of Deaths from each Specified Disease and Class of Diseases, returned as having occurred in the State during the Census year ended June 1, 1875.....	214
Table 36 — Showing, by Counties, the Percentage of Deaths returned as having occurred during the Census year ending June 1, 1875.	216

V. Blind, Deaf and Dumb, etc.

Table 37 — Showing the Number of Blind, of Deaf and Dumb, of Idiotic, and of Insane persons enumerated at the Censuses of 1850, 1855, 1860, 1865, 1870 and 1875, with Distinction of Sex.....	216
Table 38 — Showing the Number of Persons returned as Blind, as Deaf and Dumb, as Idiotic, and as Insane, in each County of New York, at the Census of 1875.....	216
Table 39 — Showing the Number, at the Census of 1875, of each Class of Unfortunates in the entire population, and in each of twelve classes of the population, in respect to General Nativity, Race and Sex.	216
Table 40 — Showing the Number, at the Census of 1875, of each Class of the Unfortunates to 100,000 persons of the entire population, and to 100,000 persons of each of twelve classes of the population, in respect to General Nativity, Race and Sex	216
Table 41 — Showing, by Counties, where the Unfortunate classes, enumerated at the Census of 1875, were born.....	217
Table 42 — Showing the Ages of the Blind, the Deaf and Dumb, the Idiotic and the Insane, enumerated at the Census of 1875, with Distinction of Sex, Race, and General Nativity	217

VI. Sex.

Table 43 — Showing, by Counties, and by Race and General Nativity, the Number of Persons of each Sex in New York, at the Census of 1875.....	218
--	-----

VII. Marriages and Conjugal Condition.

Table 44 — Marriages returned as having occurred during the Census year ended June 1, 1875, with Ages of Husbands and Wives in combination.....	220
Table 45 — Showing, by Counties, Towns, and Wards of Cities, and by Sex and General Nativity, the number of Single, of Married, of Widowed and of Divorced Persons, in New York, at the Census of 1875, also the number of Married Persons whose husbands or wives were absent, and how the married, whose husbands or wives were present, as native and foreign-born, were inter-married	222
Table 46 — Showing, by Counties and by Sex and General Nativity, the number of Single, of Married, of Widowed and of Divorced Persons, in New York, at the Census of 1875, also the number of Married Persons whose husbands or wives were absent, and how the Married, as native and foreign-born, were inter-married.....	237

VIII. Areas, Dwellings, Families.

Table 47 — Showing, by Counties, Towns, and Wards of Cities, and by Material, the Number and Value of the Dwellings returned in the Census of 1875 ¹	238
Table 48 — Showing, by Material, the Number and Value of the Dwellings returned in the twenty-four cities, at the Census of 1875.....	252

TABLE OF CONTENTS.

v

Table 49 — Showing, by Counties, and by Material, the Number and Value of the Dwellings returned in the Census of 1875	PAGE. 253
Table 50 — Showing, by Counties, Towns and Wards of Cities, the Number of Persons of Families and of Inhabited Houses, and the average number of Persons to a Family and of Persons to an Inhabited House, at the Census of 1875	254
Table 51 — Showing, for each County and the State, the Area in square miles; the Number of Families; the Number and Value of Inhabited and of Uninhabited Dwellings; the Number, Total Value, and Average Value of all Dwellings; what per cent of all Dwellings are of certain classes when divided according to value; the Number of Persons, of Families and of Dwellings to a square mile; the number of Acres to a Person, of Persons to a Family and to an Inhabited Dwelling; and the average value of Inhabited House Accommodation to a Family	264

IX. Churches.

Table 52 — Showing, by Counties and by Denominations, the Number of Church Organizations, of Church Members, of Church Edifices, and of Sittings; the Value of Church Property, and the annual amount of Salaries paid the Clergy	266
Table 53 — Showing, for the State, by Denominations, the Number of Church Organizations, of Church Members, of Church Edifices, and of Sittings; the Value of Church Property, and the annual amount of Salaries paid the Clergy	274
Table 54 — Showing, for all Denominations, by Counties, the Number of Church Organizations, of Church Members, of Church Edifices, and of Sittings; the Value of Church Property, and the annual amount of Salaries paid the Clergy.....	275

X. Agriculture.

Table 55 — Showing, by Counties and Towns, the Area of Farm Lands; the Value of Farms, of Farm Buildings, of Live Stock and of Implements; the Area of Crops, and the Amount of Agricultural Productions	276
Table 56 — Showing, by Counties, the Area of Farm Lands; the Value of Farms, of Farm Buildings, of Live Stock and of Implements; the Area of Crops, and the Amount of Agricultural Productions.....	404
Table 57 — Number and Size of Farms in New York at the Census of 1875, by Towns.....	412
Table 58 — Number and Size of Farms in New York at the Censuses of 1870 and 1875, by Counties.....	420
Table 59 — Increase or Decrease in the Number of Farms, of each Class, during the interval between the Censuses of 1870 and 1875, by Counties.....	421
Table 60 — Showing, by Counties and Towns, for the years 1855, 1864, 1865, 1874 and 1875, the Number of Sheep Shorn, the Total Weight of the Clip, and the Average Weight of the Fleeces.....	422
Table 61 — Showing, by Counties, the Number of Sheep, the Total Production of Wool, and the Average Weight of Fleeces, at the Census of 1870.....	433
Table 62 — Showing, by Counties, for the years 1855, 1864, 1865, 1874 and 1875, the Number of Sheep Shorn, the Total Weight of the Clip, and the Average Weight of Fleeces.....	434
Table 63 — Statistics of Butter and Cheese Factories for the Season of 1874.....	435
Table 64 — Increase Per Cent in Acreage, Crops, etc., from 1865 to 1875.....	435
Table 65 — Average yield per acre, 1874, of the principal crops.....	436
Table 66 — Average yield, 1874, of the principal crops per 100 acres of improved land.....	437

XI. Occupations.

Table 67 — Showing the Number of Persons Engaged in each Occupation, with distinction of Age and Sex and Nativity ...	438
--	-----

XII. Public Debt.

Table 68 — Showing the Public Debt, as returned, of each County, City, Town and Incorporated Village of New York, on the first day of June, 1875.....	446
Table 69 — Aggregate Public Indebtedness, as returned, of each County and of the State, on the first day of June, 1875,	463

XIII. Census of Indian Reservations.

Table 70 — Population of Indian Reservations at all Censuses, 1845-1875.....	464
Table 71 — Population, General Nativity, Sex, Males of Military Age, Persons of School Age and Illiterates, of Indians on Reservations, at Census of 1875.....	464
Table 72 — Birthplaces of Indians on Reservations, Census of 1875.....	464
Table 73 — Civil or conjugal condition of Indians on Reservations, at Census of 1875.....	464
Table 74 — Unfortunate classes among Indians on Reservations, Census of 1875.....	464
Table 75 — Dwellings of Indians on Reservations at the Census of 1875, classified by Material and Value.....	464
Table 76 — Persons, Families and Dwellings of Indians on Reservations, June 1, 1875, by Reservations and by Counties,	465
Table 77 — Statistics of Churches on Indian Reservations, Census of 1875.....	465
Table 78 — Occupations of Indians on Reservations, Census of 1875.....	465

CENSUS OF 1875.

REPORT

FROM THE SECRETARY OF STATE.

OFFICE OF SECRETARY OF STATE, }
ALBANY, *December 15, 1877.* }

A provision of the original Federal Constitution requires that a census of the United States of America should be taken at intervals of ten years, for the purpose of ascertaining the proper ratio of representation in Congress to which the several States should be entitled, and for obtaining other information necessary to intelligent legislation. Under laws passed in pursuance of this provision, a Federal census was taken in the years 1790, 1800, 1810, 1820, 1830, 1840, 1850, 1860 and 1870.

The constitutions adopted by the people of the State of New York in the years 1821 and 1845, provided respectively that a census of the population should also be taken every ten years, and for corresponding purposes. That of 1821 provided for an enumeration of the inhabitants, under the direction of the Legislature, in the year 1825, and at the end of every ten years thereafter; and that the senatorial districts should be so altered by the Legislature at the first session after the return of every enumeration, that each district should contain, as nearly as might be, an equal number of inhabitants, excluding aliens, paupers, and persons of color not taxed, and remain unaltered until the return of another enumeration.

The Constitution of 1846, article III, section 4, provided for an enumeration of the inhabitants of the State, to be taken under the direction of the Legislature in the year 1855, and at the end of every ten years thereafter, under like conditions and for the same purposes.

By virtue of this authority, and by virtue of an act entitled "An act in relation to the census or enumeration of the inhabitants of the State," passed on the twelfth of March, 1855, and the several subsequent statutory amendments to it, I have now the honor to submit the results of the Sixth Census of the State of New York, taken on the first day of June, 1875.

The enumeration provided for in chapter 40 of the Laws of 1875, and a partial digest of the population returns, were conducted and concluded by my predecessor. To digest and tabulate the remaining returns, so as to give them, if possible, a value proportioned to the cost of procuring them,

was one of the first and most difficult of the duties which devolved upon me on entering upon my duties as Secretary of State. I lost no time in seeking a person whose natural faculties, experience and training qualified him for the superintendence of this work. I was fortunate enough to secure the assistance of Mr. C. W. Seaton, a gentleman who had assisted in digesting the Federal census of 1870, and who unites in himself, in an eminent degree, the qualities which are most desirable for such duties. This work was confided to him on the 1st of January, 1876. He was instructed to organize his staff of clerks strictly and exclusively upon the principle of securing the greatest practicable expedition, efficiency and accuracy. In the prosecution of these ends, notices were sent to all candidates for employment on the census to appear at the census rooms* for examination. The accuracy and rapidity with which the candidates could add a series of columns of figures were the only tests to which they were subjected.

The cost of the enumeration of the census of 1875, and paid by the counties, was \$263,054.99, distributed among the several counties as follows:

Expense of the Enumeration, Census of 1875, paid by the several Counties.

COUNTIES.	Amount.	COUNTIES.	Amount.	COUNTIES.	Amount.	COUNTIES.	Amount.
The State	\$263,054 99	Essex	\$2,348 72	Oneida.	\$7,679 27	Schuyler	\$1,599 39
Albany.....	9,052 30	Franklin	2,314 14	Onondaga.....	6,336 63	Seneca	2,117 74
Allegany.....	3,089 35	Fulton	1,763 75	Ontario	3,023 67	Steuben.....	4,947 01
Broome	3,106 59	Genesee.....	1,913 72	Orange	4,064 33	St. Lawrence....	4,908 79
Cattaraugus....	3,382 45	Greene.....	2,870 50	Orleans	1,796 00	Suffolk	3,523 34
Cayuga.....	3,793 75	Hamilton ...	513 00	Oswego.....	4,213 33	Sullivan.....	2,851 07
Chautauqua....	3,585 75	Herkimer	2,595 34	Otsego.....	3,534 30	Tioga	1,998 72
Chemung	2,140 00	Jefferson	4,377 04	Putnam	910 00	Tompkins.....	2,236 55
Chenango	2,927 31	Kings.....	18,000 00	Queens	3,771 48	Ulster	5,354 25
Clinton	2,829 99	Lewis	1,510 68	Rensselaer	7,488 48	Warren	1,387 32
Columbia	3,306 10	Livingston	2,782 75	Richmond.....	1,540 09	Washington.....	3,273 00
Cortland	2,147 40	Madison	3,138 50	Rockland	1,356 00	Wayne	3,295 72
Delaware.....	2,606 48	Monroe	6,015 00	Saratoga	4,077 97	Westchester.....	5,207 75
Dutchess.....	4,425 00	Montgomery ..	2,836 84	Schenectady....	1,710 23	Wyoming	1,927 48
Erie.....	9,033 30	New York.....	51,740 00	Schoharie	2,522 58	Yates	1,601 50
		Niagara	2,655 25				

The appropriations made by the State for compiling the results of the census, and which, as the amount is practically exhausted, represents the cost of compiling the results of the census and digesting and tabulating them for the press, have been as follows:

March 4, 1875	\$40,000
May 1, 1876	30,000
March 28, 1877.....	30,000
	<u>\$100,000</u>

The time and money spent in compiling the results of this census have been a little more than for any other previous census taken in this State. The reasons were sufficiently stated in the following extract from a communication addressed to the Speaker of the Assembly on the 22d of January, 1877,† notifying him of the exhaustion of the appropriation for this work and its temporary suspension:

“It would be sufficient for my present purpose, perhaps, to say that the population of the State has increased twenty-three per cent since the census of 1865. This, however, would not wholly account for certain differences in the amounts and qualities of work done on those censuses respectively, to which I attach the utmost importance.

“The element of first importance in a census, and without which all labor and expenditure is absolutely wasted, is accuracy; and this is a merit, I regret to say, which is wanting in the census of 1865;

* The lower hall of the Old State Hall was assigned by the Commissioners of the Land Office to the Secretary of State for the census work.
† Assembly Doc. No. 34, Session of 1877.

and for the reason, mainly, that with a view to economy, the classification in that year was made by clerks whose work was subjected to no adequate tests nor verified by effective revision. As I will show presently, no census can possibly deserve confidence that is based upon the additions and computations of a single clerk. I have felt it my duty, since the census of 1875 came under my control, to require the tally to be verified invariably page by page, and the tally of the different classes of work to conform to such verification, page by page. In compiling agricultural returns of our census, for example, I required every page to be added, independently, by two clerks, neither of whom knew the result attained by the other. These results were compared, and if they agreed they were accepted; if they varied they were re-examined, and the cause of the variance ascertained and removed.

“So, in the classification of the returns of population, tables were first made showing for each page of the return the population, whether native or foreign-born, white or colored, male or female. This was done twice, independently, by different clerks; the results were compared, and all variances examined and errors corrected.

“These tables furnished the basis for a page-by-page check, and comparisons in the subsequent tallies by age and sex, by nativities and by occupations, in each of which some or all of the classes of the first-named tables are again brought out for each page of the return.

“This was the system of compilation adopted for the Federal census of 1870, by far the most complete and reliable ever made in this country, and, in my judgment, all the precautions and tests I have used were indispensable to secure reliable results. Of course they have required considerably more than double the amount of labor bestowed upon the census of 1865.

“To show the kind of census which would have gone to the Legislature, had I pursued the usual course of single additions as in 1865, I will here submit a list of the errors made in the computations of the first seven counties, taken in alphabetical order, by the clerks in my office, who made the first additions. It should be borne in mind in reading this list:

“First, that nearly every clerk in the department was selected for this work after a rigorous competitive examination, and chiefly for his expertness in addition.

“Second, that his pay, his promotion, and even his retention, depended very largely upon his accuracy. He knew that every error he made was sure to be detected, and he was likely, therefore, to be more careful than a clerk whose work was not to be reviewed, and who, therefore, had no such apprehension.

“The number of errors in the addition of the returns of agriculture alone was:

For Albany county	559	For Chemung county	368
For Allegany county.....	1,099	For Chenango county.....	1,003
For Broome county.....	819		—————
For Cayuga county	1,448	An aggregate of	6,763
For Chautauqua county	1,467		=====

“These errors were not confined to the columns of units, nor of tens, nor of hundreds, nor of thousands. Many of them occurred in the ten thousand column. I am able to make this point more clear by a table of the errors made in adding the agricultural returns in a single one of the counties I have named. In adding those of Allegany, for example, 370 errors occurred in the columns of units, 292 in the column of tens, 157 in the column of hundreds, 58 in the column of thousands, and 10 in the column of ten thousands. These were the errors in adding the agricultural returns of a single county. No one will pretend that it is a matter of secondary importance whether the census shows ten or ten thousand saw-mills, or ten or ten thousand horses, or ten or ten thousand dwelling-houses, or churches, or ten or ten thousand married or insane people in a single county.

“Had not these additions been reviewed and tested and the errors corrected, they would have all gone to the public, many of them would have never been detected, and the result of the census, it is

needless to say, would not have been merely worthless, it would have been pernicious. What the census of 1875 would be, compiled in this way, as might naturally be inferred, the census of 1865 practically is; and yet the census of 1865, I presume, is quite as reliable as any census with which our State has yet been favored.

"At page CII of the introduction to the census of 1865 it is stated that in that year the acres of buckwheat sown amounted to 22,612 $\frac{3}{4}$, harvested, 3,486,101 $\frac{1}{2}$ bushels, or at the rate of 154 bushels to the acre. One requires a very limited agricultural education to know that thirty bushels of buckwheat to the acre is a generous crop. This is not, as one might infer, a typographical error, for the same figures appear upon page 397, as footings of the second and fourth columns.

"At page fifty-four we find eighty-six LOG houses reported in the eighth ward of Albany, as valued at \$155,230, or a little over \$1,800 a piece.

"The town of Seneca Falls is credited with 14,428 slaughtered swine in 1864 and only 114,467 pounds of pork, an average of only ten pounds a head.

"But the wildness of some of these computations may be made more apparent by taking a special industry and following it through a number of counties.

"The table of sheep shorn in 1864 and in 1865, the number of pounds of wool taken from them in the aggregate and the average clip, will be found to yield some extraordinary results; for example: In the town of Throop, in Cayuga county, the amount of wool yielded per sheep, in 1864, was 4.03, and in 1865, 20.13. In Chemung, the yield was 33.09 per sheep in 1864, and only 3.27 in 1865; in Montague, Lewis county, the yield in 1864 was 21.56 per sheep and 3.94 in 1865. In the town of Galway, Saratoga county, we find sixteen extraordinary sheep yielding 25,900 pounds of wool, or 1,618.75 pounds per head in 1865, while in 1864, 5,872 sheep, in the same place, yielded only six and one-half pounds of wool more than the sixteen yielded in 1865, or at the rate of only 4.41 per head. The most superficial glance at this table shows that its results are utterly worthless for statistical purposes, and that the errors resulted mainly from omissions to subject the returns first, and the computations afterward, to practical tests.

"To avoid a misunderstanding, let me here say, that in the criticisms of the census of 1865, there is no intention to cast any reproach whatever upon those who conducted it. With the money appropriated to the work, it could not probably, at the time it was done, have been much better done; and I am quite free to admit that had we pursued the method of single additions, I could not have hoped to offer the Legislature any thing in a statistical point of view less unworthy of its attention, or for scientific purposes of any considerable value.

"The work, since it came into my hands, has been conducted under the superintendence of Mr. C. W. Seaton, who had a valuable experience in preparing the Federal census of 1870, and whose pre-eminent qualifications for this duty are incontestable. All the clerks in his bureau have been selected with great care, and most of them by competitive examinations; and the office has been worked, I think, with the greatest possible economy and judgment. Owing to the low price of labor, Mr. Seaton has been able to employ a very large proportion of his clerks at from fifty to sixty dollars a month, which is a far lower rate than is paid for corresponding work in any other department of the State service.

"When finished, the census of 1875 will be as accurate a digest of the returns made by the enumerators as it is possible to obtain; and I venture further to assure you, that it will have cost the State less money than any digest made with corresponding accuracy has ever cost before in this country or in any other."

The tables into which the most important results of the census of 1875 have here been digested, may be classified as follows:

- | | |
|----------------------|---------------------------|
| 1. Population. | 3. Social Statistics. |
| 2. Vital Statistics. | 4. Industrial Statistics. |

POPULATION.

The total population of the State of New York on the first day of June, 1875, was 4,698,958, an increase upon the Federal census of 1870 of 316,199, or $7\frac{21}{100}$ per cent, representing an average annual increase of $1\frac{40}{100}$ per cent.

The following table gives the population of the State at each of the enumerations made since 1790, together with the rate of increase or decrease of population from each preceding census:

Aggregate Population.

Census of	Population.	INCREASE OR DECREASE FROM PREVIOUS CENSUS.			
		TOTAL.		AVERAGE ANNUAL.	
		Absolute.	Per Cent.	Absolute.	Per Cent.
1875.....	4,698,958	316,199	7.21	63,240	1.40
1870.. ..	4,382,759	554,941	14.50	110,988	2.74
1865.....	3,827,818	—52,917	—1.36	—10,583	—0.27
1860.....	3,880,735	414,523	11.96	82,905	2.29
1855.....	3,466,212	368,818	11.91	73,764	2.28
1850.....	3,097,394	492,899	18.92	98,580	3.53
1845.....	2,604,495	175,574	7.23	35,115	1.41
1840.....	2,428,921	254,404	11.70	50,881	2.23
1835.. ..	2,174,517	255,909	13.34	51,182	2.54
1830.....	1,918,608	302,150	18.69	60,430	3.49
1825.....	1,616,458	243,646	17.75	48,729	3.32
1820.....	1,372,812	336,902	32.52	56,150	4.80
1814.....	1,035,910	76,861	8.01	19,215	1.95
1810.....	959,049	369,998	62.81	37,000	4.99
1800.....	589,051	248,931	73.19	24,893	5.65
1790.....	340,120				

Assuming the substantial accuracy of these returns the rate of increase which these figures establish, according to the estimate of Mr. Seaton, given below,* will give to the State of New York at the close of the century between six and seven millions of inhabitants.

*“ If the annual rate of increase per cent during the past three-fourths of the century had been practically constant, the presumption would be fair that it would continue constant during the other fourth; and the probable population at the remaining quinquennial enumerations of the century would be derivable by applying this rate to the computation.

The fact is, however, that the rate has steadily decreased, as the following table shows:

Period.	Average annual rate of increase per cent.
First Quarter Century, 1800–1825	4.12035
Second Quarter Century, 1825–1850.....	2.63554
Third Quarter Century, 1850–1875.....	1.68040

Does this decrease of the annual rate of increase follow any law which will furnish the basis of a forecast, affording better grounds for confidence than mere conjecture?

Perhaps the fact that the ratio of these successive rates to each other is very nearly equal—that of the second to the first being .63964, and that of the third to the second being .63759; or, in other words, the rate for the second quarter century being very nearly five-eighths of that for the first quarter, and that for the third quarter being very nearly five-eighths of that for the second quarter—does afford such a basis.

If it be accepted, then, taking the mean of these rates, .6386, as the

probable ratio of the average annual rate of increase for the fourth quarter to that for the third quarter, we derive for that rate 1.0731.

Assuming the annual rate for the quinquennium 1875–1880 to be 1.38 (that for 1870–1875 being 1.40, see Table 5), and that the factor of increase varies from one quinquennium to another by a constant factor:

Let p be that factor, and
Let r be the factor of increase for the quinquennium 1875–1880,
Then $rp =$ “ “ “ 1880–1885,
 $r^2p^2 =$ “ “ “ 1885–1890,
 $r^3p^3 =$ “ “ “ 1890–1895,
 $r^4p^4 =$ “ “ “ 1895–1900,
Whence $r^5p^{10} =$ “ “ “ 1875–1900,

But as the annual rate of increase per cent 1875–1880 is 1.38, the factor of increase for that period is $(1.0138)^5$ or $r = (1.0138)^5$, and as the annual rate of increase per cent, 1875 to 1900, is 1.0731, the factor of increase for that period is $(1.010731)^{25}$, or $r^5p^{10} = (1.010731)^{25}$.

Hence $p = \left(\frac{1.010731}{1.0138}\right)^{\frac{25}{5}}$ and the probable population of the State at each enumeration till 1900 is as follows:

Census of	Probable Population.
1880	5,032,225
1885	5,348,450
1890	5,641,642
1895	5,905,939
1900	6,136,009”

The population of the State of New York may be classified according to nativity, race and sex, as follows:

Total population.....	4,698,958	Race:	
General nativity:		White.....	4,642,837
Native.....	3,503,300	Colored.....	56,121
Foreign-born.....	1,195,658	Sex:	
		Males.....	2,320,178
		Females.....	2,378,780

In the following table giving the rate of increase and decrease of population by counties, in the order of their increase and decrease, between the years 1870-1875, it will be observed that eleven counties have lost in their aggregate population, eight in their native, twenty-six in their colored and twenty-seven in their foreign population.

Increase per cent of the Population from 1870 to 1875.

RATE OF INCREASE PER CENT OF THE AGGREGATE POPULATION, 1870-1875.		RATE OF INCREASE PER CENT OF THE WHITE POPULATION, 1870-1875.		RATE OF INCREASE PER CENT OF THE COLORED POPULATION, 1870-1875.		RATE OF INCREASE PER CENT OF THE NATIVE POPULATION, 1870-1875.		RATE OF INCREASE PER CENT OF THE FOREIGN POPULATION, 1870-1875.

NOTE. The minus sign prefixed to certain of the rates in the above Table, denotes a decrease, instead of an increase of the Population.
(a) Present area. See note on page 21.

The counties which have gained most in their aggregate and their white population are Kings, Essex, Chemung and Hamilton; in colored population, Hamilton, Cortland, Essex, Steuben and Putnam. The counties that have gained most in foreign population are Essex, Chemung, Chautauqua, Fulton and Suffolk.

The increase of foreign population in New York city has been below the average increase in the State.

The following tables give the numbers of the population of native and of foreign birth from 1845 to 1875 inclusive, together with the rate of increase and decrease in their numbers respectively, from previous enumerations during that period:

Increase and decrease of native-born population since 1845.

1850.....	655,929	258,355	64.98	51,671	10.53
1845.....	397,574				

The native-born population is $74\frac{555}{1000}$ per cent, and the foreign-born $25\frac{445}{1000}$ per cent of the whole population of the State.

No inquiries into the nativities of our population were instituted before the census of 1845, when the native-born population of the State was stated at $72\frac{73}{100}$ per cent; the portion born in the New England States at $81\frac{78}{100}$ per cent; that born in other States and Territories of the United States at $31\frac{31}{100}$ per cent; in Great Britain and its possessions, $10\frac{67}{100}$ per cent; in France, $4\frac{1}{100}$ per cent, and in Germany, $1\frac{90}{100}$ per cent.

The following table shows the aggregate white population of the State at the several enumerations from 1790 to 1875 inclusive, together with the rate of increase and decrease per cent from previous enumerations.

Increase and decrease of white population.

White Population.

1830.....	44,945	5,244	13.21	1,049	2.51
1825.....	30,701	334	0.85	67	0.17
1820.....	39,367	1,273	3.34	212	0.55
1814.....	38,094	—2,256	—5.59	—564	—1.43
1810.....	40,350	9,030	28.83	903	2.57
1800.....	31,320	5,342	20.56	534	1.89
1790.....	25,978				

By these tables it appears that the only quinquenniums since 1790, in which the colored population has increased in equal proportion to the white in this State, were between 1835 and 1840 and between 1865 and 1870. The average annual rate per cent of increase of

Increase of white and colored population contrasted.

the colored population from 1790 to 1875, inclusive, is but 0.91 per cent, while the corresponding rate of increase of the white population for the same period is 3.22 per cent.

During the term 1860-1870, the increase of the colored population in the northern States was 50 per cent, or at the average annual rate of 4.13 per cent; but this gain, says Mr. Walker,* was notoriously not by excess of births but by migration northward." It will be observed that the average annual rate of increase per cent, during the last five years, in the State of New York, was only 1.32.

About half of the colored population of the State may be found in the following four counties: New York, 15,254; Kings, 6,994; Queens, 3,664; and Orange, 2,478, making an aggregate of 28,390.

The following table gives the average annual rate of increase from 1790 to 1875 by race, and by nationality as well as race, from 1845 to 1875:

	Aggregate.	White.	Colored.	Native.	Foreign.
1790-1875.....	3.14	3.22	0.91		
1845-1875.....	1.99	2.25	0.79	1.55	3.74

The following table exhibits the comparative increase in the rural and in the urban and suburban population between the censuses of 1865 and 1875.

It shows that by far the greatest increase in our population has been realized by the cities and their suburbs, and a marked tendency of the people like other bodies to gravitate toward larger masses. While the cities and suburbs have increased at the rate of 34.93 per cent., the rural districts do not appear to have increased more than 1.99.

Comparative increase in Rural and Urban and Suburban Population in the decade between Censuses 1865 and 1875.

	POPULATION.		INCREASE. 1865-1875.	
	1865.	1875.	ABSOLUTE.	PER CENT.
Rural	1,414,110	1,442,190	28,080	1.99
Urban and Suburban.....	2,413,708	3,256,768	843,060	34.93
Total	3,827,818	4,698,958	871,140	22.76

As Urban and Suburban are here classed: 1st, Cities; 2d, Towns lying adjacent to Cities of 20,000 Population; 3d, Towns containing Villages of 1,000 inhabitants.

Of the aggregate population of the State, on the 1st of June, 1875, 3,503,300 were native born and 1,195,658 were of foreign birth.

Of the total population of the State, 3,202,060 were born within the State, leaving a population of 1,496,898 as born in other States and countries; 2,505,710, or a little more than half the entire population of the State, were born within the counties where they were enumerated; 301,240 were born in other States of the Union, and 1,195,658 were born in foreign countries. Of the latter, we received 73,340 from Canada, 119,090 from England, 367,351 from the German Empire, 517,337 from Ireland, 27,364 from Scotland, and 91,176 from other foreign countries.

The following table shows, on a basis of a population of 100,000 for each county and for the State, what proportion of the inhabitants of each county and of the State, at the census of 1875, were born in the several counties, states and foreign countries designated.

* Some results of the census of 1870, read before the American Social Science Association in 1873, by Professor F. A. Walker, p. 82.

Warren . . .</																						

By this table, it appears that the three counties having the largest proportion of native-born population are : Schoharie, $97\frac{337}{1000}$ per cent ; Chenango, $94\frac{742}{1000}$ per cent ; Otsego, $94\frac{661}{1000}$ per cent. The three counties having the smallest percentage of population born within the United States are : New York, $57\frac{189}{1000}$; Kings, $65\frac{24}{1000}$; and Erie, $66\frac{518}{1000}$. This gives to the counties of New York, $42\frac{811}{1000}$; Kings, $34\frac{976}{1000}$; Erie, $33\frac{482}{1000}$ per cent of foreign population. The largest percentage of the population of foreign birth were : Irish, $11\frac{10}{1000}$ per cent ; the next of German, $7\frac{818}{1000}$ per cent ; of English, but $2\frac{534}{1000}$ per cent ; of Scotch, but $\frac{582}{1000}$ of one per cent ; of other nationalities, $1\frac{940}{1000}$.

The counties having the largest percentage of Irish are : New York, $19\frac{108}{1000}$; Kings, $16\frac{315}{1000}$; and Richmond, $15\frac{465}{1000}$.

The counties having the largest percentage of people of German extraction are : Erie, $19\frac{47}{1000}$; New York, $15\frac{839}{1000}$; Monroe, $11\frac{750}{1000}$.

The three counties with fewest Irish are : Schoharie, $1\frac{257}{1000}$ per cent ; Delaware, $2\frac{281}{1000}$; Otsego, $2\frac{275}{1000}$.

The counties with the fewest Germans are : Franklin, $\frac{52}{1000}$ of one per cent ; St. Lawrence, $\frac{132}{1000}$ of one per cent ; Schuyler, $\frac{153}{1000}$ of one per cent.

Other States of the Union have contributed only $6\frac{411}{1000}$ per cent to our population. Of these, the largest contributors are : Pennsylvania, $1\frac{187}{1000}$; Massachusetts, $\frac{928}{1000}$; and New Jersey, $\frac{914}{1000}$ per cent.

VITAL STATISTICS.

AGE AND SEX.

The following table gives the native-born white and foreign-born white and the colored population of New York by their ages, at the Census of 1875, and distinguishing their sex.

Age Periods.	NATIVE WHITE.		FOREIGN-BORN WHITE.		COLORED.	
	Males.	Females.	Males.	Females.	Males.	Females.

Of the entire native-born population of the State, white and colored, 109,804 were returned as under one year of age. This may be regarded as an approximation to the annual increase of native population by births.

THE VOTING, MILITARY AND SCHOOL AGES.

Of the total population of the State in 1875, 1,267,522 males were of the voting age — twenty-one years and upwards. Of these, 747,280 were native of the United States; 394,182 were naturalized citizens, and 126,060 were aliens. Subtracting the latter, it leaves 1,141,462 as the aggregate population of the State entitled to vote, unless disfranchised for crime.

The following table shows by Counties the number of males of voting age, and the number of males of voting age who are not aliens; the number of votes cast for electors at the Presidential election in 1876; also the proportion of votes cast to the number of males of voting age, and to the number of males of voting age who are not aliens:

Counties.	Males of voting age, June 1st, 1875.	Males of voting age, less alien males of voting age, June 1st, 1875. (a)	Electoral vote, Presidential election, November 7th, 1876.	Per cent of vote cast to males of voting age.	Per cent of vote cast to males of voting age, less alien males of voting age.	Counties.	Males of voting age, June 1st, 1875.	Males of voting age, less alien males of voting age, June 1st, 1875.	Electoral vote, Presidential election, November 7th, 1876.	Per cent of vote cast to males of voting age.	Per cent of vote cast to males of voting age, less alien males of voting age.

The only counties in which the naturalized voters exceed the native-born voters in number, are Erie, Kings and New York, where they are in the following proportions:

	Naturalized voters.	Native.	Excess of naturalized.
Erie	21,731	21,332	399
Kings	60,062	54,452	5,610
New York.....	141,179	90,973	50,206

(a) This column contains those entitled to vote, and those native and naturalized males of voting age who are disfranchised.

Of the entire population of the State, there are 956,874 males between the ages of 18 and 45, or the usual age period for military service.

The number between the ages of 5 and 18, or what is commonly regarded as the school age, is about equally divided between the two sexes: 639,980 males, 639,477 females, making 503 more males than females and an aggregate of 1,279,457 persons in the State of a school age.

The percentage of increase of population, according to sex, between 1870 and 1875, is exhibited in the following table:

	NUMBER IN		Increase between 1870 and 1875.	Increase per cent.
	1870.	1875.		
All classes.....	4,382,759	4,698,958	316,199	7.21
Native white males	1,572,553	1,704,064	131,511	8.36
Native white females	1,620,607	1,744,894	124,287	7.67
Foreign white males.....	565,343	589,431	24,088	4.26
Foreign white females	571,707	604,448	32,741	5.73
Native colored males	24,639	25,696	1,057	4.29
Native colored females.....	26,607	28,646	2,039	7.66
Foreign colored males	694	987	293	42.22
Foreign colored females	609	792	183	30.05

NOTE. — With the colored are here included Indians not on Reservations, Chinese and Japanese.

MORTALITY.

It will always be difficult to determine what value to attach to any returns of the causes of mortality, so long as those returns are made by a large number of people acting under no uniform system of instruction and possessing the most unequal natural and professional qualifications for such work. The returns of the census of 1875, on this subject, probably possess as much value as such returns generally do, but that value is limited, I think, to general results, and cannot be relied on for specific details. For this reason these returns have been digested into a table which, for scientific purposes, seems to be open to the fewest possible objections. It gives the number of deaths from all causes, grouped into classes, recognizing certain important distinctions of race and nativity.

The total mortality of the State as returned for the year ending June 1, 1875, was 53,860, or about 1⁵/₁₀₀ per cent of the total population of the State. Of this number, 10,441 were of foreign birth; 5,249, or a little more than half of these, were Irish, and 2,711 were of German origin. It will be observed that the mortality among the Irish is disproportionately large, 101 in every 10,000 to 74 in every 10,000 of German.

BLIND.

During the last twenty-five years diseases of the eye seem to have been steadily on the increase. While the population has increased only about 52 per cent, the blind have a little more than doubled. In 1850 the total number of both sexes in the State thus afflicted was 1,181; in June, 1875, the number was 2,256.

The following table shows what proportion of various classes of the population, when reduced to a basis of 100,000, were blind:

Class.	Persons.	Blind.	Class.	Persons.	Blind.
Native	100,000	45	Foreign White Males.....	100,000	67
Foreign	100,000	57	Foreign White Females.....	100,000	46
White	100,000	48			
Colored	100,000	86	Colored Males	100,000	105
Males	100,000	56	Colored Females.....	100,000	68
Females	100,000	41			

The excess of foreign-born over native blind, of colored over white blind, and of male over female blind, may be attributed in a great degree to the difference in their occupations; the foreign and colored males having to compete with the native white are naturally forced in a large measure to accept the less desirable and less wholesome employments. As between the sexes, the employments most perilous to the eyes fall largely upon the males.

DEAF MUTES.

The number of deaf mutes in 1875 was 2,483, against 1,263 in 1850, or 53 to every hundred thousand population of the State. The deaf mutes in 100,000 persons of each of the following classes were: native-born, 62; foreign-born, 27; white, 53; colored, 39.

IDIOTIC.

Of this class of unfortunates the number returned in 1875 was 2,392, as against 1,665 in 1850. Of these, 1,356 were males and 1,036 females.

INSANE.

The number of insane has more than trebled since 1850, and on the first of June, 1875, was returned at 8,091 against 2,521 in 1850. Of these, 3,510 are males and 4,581 are females, giving 151 male and 193 female insane in every hundred thousand. There is a still larger disproportion between the native and foreign-born insane, the natives numbering 120 to every hundred thousand, and foreign-born 327 to every hundred thousand.

The following table gives the number of blind, deaf mutes, idiotic and insane, distinguished according to sex, for the years 1850, 1855, 1860, 1865, 1870 and 1875:

YEAR.	BLIND.			DEAF AND DUMB.			IDIOTIC.			INSANE.		
	Both Sexes.	Males.	Females.	Both Sexes.	Males.	Females.	Both Sexes.	Males.	Females.	Both Sexes.	Males.	Females.
1850	1,181	711	470	1,263	699	564	1,665	970	695	2,521	1,224	1,297
1855	1,136	682	454	1,422	785	637	1,812	1,002	810	2,742	1,215	1,527
1860	1,768	1,081	687	1,579	869	710	2,314	1,347	967	4,137	1,977	2,160
1865	1,338	806	532	1,600	876	724	1,481	816	665	3,114	1,348	1,766
1870	2,213	1,295	918	1,783	984	799	2,486	1,387	1,099	6,353	2,707	3,646
1875	2,256	1,290	966	2,483	1,380	1,103	2,392	1,356	1,036	8,091	3,510	4,581

SOCIAL STATISTICS.

MARRIAGES.

The total number of marriages returned as having occurred during the census year terminating June, 1875, was 21,987, or one to every 45 families.

The ages at which the largest number of marriages were contracted by the male sex were between 22 and 24, and of the female sex between the ages of 19 and 22. They embrace about one-third of the whole. At the age of 30, 1,046 marriages were contracted by males, and from that age the number does not rise again above 451. At the age of 25 there were 1,119 marriages contracted by females. From that age the number fell in the following year to 762; at the age of 30 to 426, and after the age of 30 the highest number reached was 226 at the age of 32. Six marriages appear to have been contracted at ages varying from 80 to 100. One man of the latter age is returned as married to a woman of the age of 55, another of 88 to a woman of 66, and another of 85 to a woman of 75.

CIVIL OR CONJUGAL CONDITION.

The following table gives the number of single, of married, of widowed, and of divorced persons in the State in June, 1875; and also the number of married persons whose husbands or wives were absent, and how the married whose husbands or wives were present as native and foreign-born were intermarried:

	Single.	Married.	Widowed.	Divorced.	Married whose Consorts were absent. (a)	HOW THE MARRIED WHOSE CONSORTS WERE PRESENT WERE INTERMARRIED.	
						To Native Con- sort.	To Foreign Con- sort.
Native Males	1,187,878	505,826	35,643	422	15,377	458,212	32,237
Native Females	1,133,824	537,074	101,935	698	16,106	458,212	62,756
Foreign Males	180,369	382,795	27,162	83	9,554	62,756	310,485
Foreign Females	170,742	350,323	84,038	146	7,601	32,237	310,485
Total	2,672,813	1,776,018	248,778	1,349	48,638	1,011,417	715,963

Nativity of unmar- Of the single, native-born population there were 54,054 more males than females.
ried females.

For every 10,000 native-born single females there are 10,476 native-born single males; and for every 10,000 foreign-born single females there are 10,564 foreign-born single males.

DWELLINGS OF THE PEOPLE.

The population of the State is set in 995,502 families, occupying 712,388 separate dwelling places, making 6.60 persons to an inhabited dwelling, and 4.72 persons to a family.

Rating the area of the State at 52,204½ square miles we have 93.60 persons to a square mile, 14.51 dwellings to a square mile, and 44.09 acres of land to each dwelling. Rhode Island, which, in 1875, was found to be the most densely populated of all the States, is reported to have had 244.9 persons to the square mile.

The following table gives the average number of persons to a family and of persons to a dwelling, the average number of families to a dwelling, of persons to a square mile, of dwellings to a square mile, and of acres to a dwelling at each Census, from 1850 to 1875, inclusive:

YEARS	Population.	Number of families.	Number of dwellings.	Persons to a family.	Persons to a dwelling.	Families to a dwelling.	Persons to a square mile.	Dwellings to a square mile.	Acres to a dwelling.
1850	2,097,391	566,869	473,936	5.46	6.54	1.20	61.70	9.44	67.80
1855	3,466,212	663,124	522,325	5.23	6.64	1.27	69.04	10.40	61.52
1860	3,880,735	758,420	615,888	5.12	6.30	1.23	77.30	12.27	52.17
1865	3,827,818	799,931	594,945	4.84	6.44	1.33	76.24	11.83	54.09
1870	4,322,759	898,772	688,559	4.88	6.37	1.31	87.30	13.72	46.66
1875	4,698,958	995,502	728,688	4.72	6.45	1.37	93.60	14.51	44.09

(a) That is, were not enumerated in the same family with themselves.

The following tables show the number, the material from which made and the value of the different kinds of dwellings inhabited and uninhabited in the State in 1875 :

Number, material and value of the dwellings of the people.

Dwellings.

About one-half, or \$1,086,619,017, in value of the dwellings of the State, lies in the county of New York, although its proportion of dwellings is but 67,126, or about one-eleventh of the whole.

It will be a surprise to many to learn that 16,032, or about one-quarter of all the dwellings in the Frame dwellings. county of New York, are still frame structures, and are estimated to be worth about one-tenth of the value of structures of the more durable material. Of these, 4,145 are in the Twelfth ward, 3,152 in the Twenty-third, 2,039 in the Twenty-second, 1,892 in the Twenty fourth, and 1,649 in the Nineteenth.

More than one-third of the dwellings of the State, 289,103, are valued at less than one thousand dollars each ; while 440,413, or considerably more than one-half of all the dwellings in the State, are valued at less than two thousand dollars, 7,134 are valued at less than fifty dollars. Of the latter but 10 are attributed to the county of New York, 396 to the county of Lewis. 408 to the county of Cattaraugus, 574 to the county of St. Lawrence, and 613 to the county of Clinton. Of houses valued at fifty and less than a hundred, 581 are attributed to the county of Franklin, 960 to the county of Clinton, and 969 to the county of St. Lawrence.

Of the 67,126 dwellings in the county of New York, 56,010 are valued at five thousand dollars and upwards.

Of the 55,876 dwellings attributed to Kings county, 48,213 are valued at two thousand dollars and upwards. Of these, 30,322 are valued at five thousand dollars and upwards ; but 10,115 are estimated at ten thousand dollars and upwards.

The various counties of the State rank in the following order as to the aggregate value of their dwelling places:

Civil Divisions.	Number of Dwellings.	Value of Dwellings.	Civil Divisions.	Number of Dwellings.	Value of Dwellings.	Civil Divisions.	Number of Dwellings.	Value of Dwellings.

EDUCATION.

The number of persons between the ages of five and twenty-one, on the first of June, 1875, was 1,575,669. At the school census taken on the 30th of September, 1875, four months later, the number returned [see Report of Superintendent of Public Instruction for 1876, pages 19 and 70] was 1,583,064. Adding to the first sum of 1,575,669 the increase for four months at the annual rate of increase of $1\frac{4}{10}$ per cent, which was the rate of increase of all classes for the years 1870 and 1875, we have the number of persons of what is known as the school age, in the State of New York, between five and twenty-one years, 1,583,022, a difference of only 42 between the school census and the State census of 1875. Such a striking coincidence tends to confirm the accuracy of both enumerations.

The number of school attendants during the year ending September 30, 1875, is given by the Superintendent as follows: Common schools, 1,059,238; private schools, 134,644. Total, 1,193,882, or 93.31 per cent of the persons of school age June 1st, 1875, and 75.77 of the persons between the ages of five and twenty-one. There can be no doubt that this number is much too large. Similar exaggerations are not uncommon in the statistics of schools, and may be attributed largely to the practice of returning the same pupil more than once. Many pupils without changing their residence are transferred from private to public schools; from lower schools to higher, and from the home or common schools to the academy, and thus are liable to be counted in each school they attend. When families change their residence, too, their children are liable to be counted twice. A family, also, may be counted in the several districts and then go out of the State, so as not to be counted in the census at all. The pupil is counted, if present any one of the three hundred and sixty-five days of the year, while in the census he is not counted except where he happens to be on one single day of the year, that on which the census is taken. The consequence is that the figures of the Superintendent do not furnish a reliable basis for an estimate of the relation which the persons who should be at school bear to those who are. General Walker's estimate of the number of school attendants of the State of New York in 1870, as obtained from the census, was 846,796. Adding 7.21 per cent, which was the rate of increase of all classes from 1870 to 1875, 61,054, gives 907,850 as the probable number of school attendants on the first of June, 1875, or 186,032 less than the number returned by the Superintendent, which is probably not far from the amount which the Superintendent's estimate of school attendants is excessive.

ECCLESIASTICAL ORGANIZATIONS AND PROPERTY.

There were, on the 1st of June, 1875, in this State, 6,320 ecclesiastical organizations of all denominations, occupying 6,243 edifices, which furnished sittings for 2,537,470 people, and having an enrolled membership of 1,146,537.

The aggregate value of the church edifices, and the lots which they occupied, is returned at \$101,105,765, while the value of other real estate belonging to the various denominations was returned at \$16,491,385, making an aggregate, of ecclesiastical property, of \$117,597,150.

The sum annually paid for salaries of clergymen is returned at \$5,308,231, or an average to each organization of \$839.91.

The following table gives the number of edifices, sittings and membership of each denomination in the State, together with the amount of property owned by each and the amount paid for the salaries of their clergy respectively :

Civil Divisions.	Organizations.	Edifices.	Sittings.	Membership.	PROPERTY.		Annual amount paid for Salaries of Clergy.

By this table it appears that the three denominations having the largest number of organizations are the Methodist Episcopal, 1,785 ; the Baptist, 823 ; and the Presbyterian, 716.

The three denominations having the largest number of edifices are the Methodist Episcopal, 1,766 ; the Baptist, 812 ; and the Presbyterian, 708.

The three denominations having the largest number of sittings are the Methodist Episcopal, 619,382 ; the Roman Catholic, 387,226, and the Presbyterian, 333,442.

The three denominations having the largest membership are the Roman Catholic, 518,714 ; the Methodist Episcopal, 180,782 ; and the Presbyterian, 111,660.

The three denominations having the largest amount of church property are the Protestant Episcopal, \$24,601,370; the Roman Catholic, \$22,668,080; the Presbyterian, \$19,114,170.

The three denominations paying the largest amount in salaries to its clergy are the Methodist Episcopal, \$1,137,885; the Presbyterian, \$950,770; and the Protestant Episcopal, \$810,872.

As many of these church organizations are scarcely distinguished from each other by any dogmatic differences their proportion of members and wealth appear to be less than they really are. For example, in getting at the numerical strength of the Methodist Episcopal church, it would be necessary to unite the Methodist Episcopal with the African Methodist Episcopal, the African Methodist Episcopal Zions, the Calvinistic Methodist, the Independent Methodist, the Methodist Protestant, the Primitive Methodist, the Reformed Methodist, the United Methodist Free Church, and the Wesleyan Methodist. This would add to the number of sittings provided for Methodists of all shades 62,831, and \$919,155 to the value of their church property. The merger of the various shades of Baptists and Presbyterians would exhibit corresponding results.

INDUSTRIAL STATISTICS.

AGRICULTURE.

NUMBER, DIMENSION AND VALUE OF FARMS.

A little more than one-tenth the population of this State in 1875 were proprietors of land. Kings county had the largest number, 26,666. New York, with 24,378, comes next. Then follow in their order Erie with 23,526, Monroe with 17,961, Oneida with 14,934, Onondaga with 14,042, St. Lawrence with 12,296, and Oswego with 12,196. The remaining counties have all less than 12,000 landed proprietors.

The county having the smallest number of landed proprietors is Hamilton, 523. Next is Putnam with 1,995, and the next, Rockland with 2,789. All the other counties have over 3,000.

The number of farms of all sizes in 1875 was 241,839. Of these much the largest class consists of those embracing between 100 and 500 acres; of these there are 90,496. The next most numerous class embraces those between 50 and 100 acres; of these there are 71,118. There were 39,973 farms of from 20 to 50 acres, and 38,970 of less than 20 acres. There are but 258 farms in the State embracing over 1,000 acres.

There has been a very substantial increase in the number of farms in the State since 1870, and this increase is most conspicuous in the class of farms of from 100 to 500 acres. The net increase in the number of farms of all sizes is 25,586, while farms from 100 to 500 acres have increased 34,548, and farms of 500 acres and upward have increased 1,037.

On the other hand, there were 2,018 less farms of between 10 and 20 acres, 14,908 less of farms of between 20 and 50 acres, and 2,838 less of farms between 50 and 100 acres, than in 1870.

The counties in which the increase has been most conspicuous are Ulster, which has gained 1,213, Clinton 1,158, and Erie 1,110.

A glance at the tables reveals a marked tendency toward the absorption of the smaller farms by the larger ones. Of this absorption there are a few conspicuous illustrations: Steuben county gained 1,712 farms of from 100 to 500 acres, and lost 1,272 of from 10 to 50 acres; St. Lawrence gained 1,658 farms, of 100 acres and upward, and lost 1,247 of a smaller size; Delaware gained 1,353 of the larger farms and lost 1,161 of the smaller; Allegany gained 1,832 farms of more than 50 acres, and lost 1,242 farms of less than 50 acres; Cattaraugus gained 1,606 of 50 acres and upward, and lost 923 of smaller proportions.

AREA OF FARM LANDS.

The aggregate of land in farms on the first of June, 1875, was 25,659,266 acres. Of this 15,875,552 acres are returned as improved and 9,783,714 as unimproved. The five counties having the largest acreage of improved farms are St. Lawrence, 712,717, Jefferson, 556,616, Steuben, 503,014, Oneida, 501,099, and Erie, 458,343.

The cash value of these farms improved and unimproved is returned at \$1,221,472,277. The five counties having farms of highest valuation are Monroe, \$42,047,759, Oneida, \$40,211,650, Westchester, \$39,305,535, St. Lawrence, \$38,399,743, and Onondaga, \$37,251,541.

The five counties having the largest amount of money invested in farm buildings other than dwellings are Onondaga, \$4,798,545, Dutchess, \$4,718,928, Orange, \$4,631,345, Oneida, \$4,571,453, and St. Lawrence, \$4,222,099. The aggregate value of farm buildings other than dwellings is \$148,715,775.

The aggregate value of stock on all the farms of the State was about the same as the value of its farm buildings and is returned at \$146,497,154. The five counties returning the largest amount of stock in value were St. Lawrence, \$6,528,127, Oneida, \$5,167,913, Jefferson, \$4,536,626, Steuben, \$4,208,065, Erie, \$4,123,270.

The following table exhibits the average production of the 241,839 farms of New York, for the census year ending June 1, 1875. It is obtained by dividing the total amount of Productions of agriculture by the total number of farms:

Hay—tons	22.50	Hops—pounds	57.25	Poultry—value sold	\$7.33
Grass Seed—bushels	0.47	Potatoes—bushels	151.50	Eggs—value sold	\$10.39
Barley—bushels	19.97	Tobacco—pounds	12.89	Heifer Calves for season of 1875—number	1.17
Buckwheat—bushels	16.51	Apples—bushels	95.59	Neat cattle slaughtered on farms—number	0.35
Indian Corn—bushels	83.92	Cider—barrels	2.22	Cows—whose milk was sent to factories	1.64
Oats—bushels	157.00	Grapes—pounds	70.43	Butter—pounds	446.05
Rye—bushels	12.60	Wine—gallons	1.29	Cheese—pounds	32.16
Spring Wheat—bushels	4.84	Maple Sugar—pounds	38.34	Milk sold in market—gallons	171.65
Winter Wheat—bushels	37.29	Maple Syrup—gallons	0.99	Wool—pounds	30.47
Beans—bushels	4.45	Honey—pounds	6.08	Sheep slaughtered—number	0.33
Peas—bushels	1.70	Colts—number	0.15	Pork made on farms—pounds	501.10

The cost of fertilizers bought in 1874, is returned at \$1,767,352. Two-thirds of this were consumed on Long Island, Queens county taking \$633,642 worth, Suffolk, \$316,737 worth, and Kings, \$138,318 worth. The next largest consumers were the counties of Cayuga, \$45,018, and Westchester, \$42,590.

The gross sales of all the farms of this State were \$121,187,467. The five counties which contributed most to this aggregate were Oneida, \$4,569,684; Monroe, \$4,556,964; St. Lawrence, \$4,452,826; Jefferson, \$3,981,027; and Onondaga, \$3,677,933.

The area of land plowed in 1875, was 3,616,086; 155,697 acres were plowed in Steuben, 141,563 in Monroe, 125,592 in Erie, 119,340 in Onondaga, and 118,320 in Jefferson.

In 1875, 5,985,929 acres were devoted to pasturage; 364,820 in the county of St. Lawrence, 258,706 in the county of Jefferson, 235,587 in the county of Oneida, 235,177 in the county of Delaware, and 226,804 in the county of Chautauqua.

In the same year 4,783,857 acres were mown. Of this area, 229,738 acres were in the county of St. Lawrence, 176,076 in the county of Jefferson, 165,420 in the county of Oneida, 164,327 in the county of Delaware, and 160,575 in the county of Otsego.

Though these were the five counties having most acreage devoted to grass, they were not all of them among the five counties which produced the most hay, the crop for 1875, of course, not being returnable in this census. In 1874, the aggregate hay crop of the State was 5,440,612 tons. Of this, the five counties contributing the largest quotas were: St. Lawrence, 261,821; Oneida, 209,097; Jefferson, 196,504; Otsego, 189,537; Delaware, 174,511.

In 1875, 282,393 acres were devoted to barley, which was an increase of about thirty-three per cent upon the area devoted to the same crop in 1874. The five counties furnishing the largest amount of land to this culture are: Ontario, 21,171 acres; Cayuga, 18,890; Niagara, 18,194; Monroe, 17,886; Livingston, 16,650. The product of barley in 1874 was 4,829,993 bushels. Supposing the increased acreage in barley to produce a proportionate amount of grain, the crop in 1875 should have amounted to about six and one-half millions of bushels. The five counties yielding the largest proportion of this are: Ontario, 379,469 bushels; Cayuga, 376,608; Jefferson, 319,011; Wayne, 317,785; and Monroe, 311,044.

There were 201,894 acres of land devoted to buckwheat in 1875. The counties furnishing the largest number of acres of this crop were: Steuben, 19,350; Schoharie, 14,316; Albany, 11,193; Saratoga, 7,033; and Broome, 6,949. The aggregate yield in 1874 was 3,992,386 bushels.

There were 673,284 acres devoted to Indian corn in 1875. This was an increase upon the area planted in 1874, of 45,535 acres. The product of this crop in 1874 was 20,294,800 bushels. The five principal contributors were: Cayuga county, 1,083,548 bushels; Wayne, 1,070,478; Monroe, 910,086; Onondaga, 894,723; and Ontario, 871,049.

More than twice as many acres were devoted to the culture of oats as to the culture of Indian corn; 1,438,166 acres were devoted to this crop in 1875, and only 1,327,975 were devoted to it in 1874, a difference of over 100,000 acres. The crop harvested in 1874 is returned at 37,968,429 bushels, to which the following five counties were the largest contributors: Jefferson, 1,861,206; St. Lawrence, 1,779,264; Steuben, 1,633,018; Erie, 1,392,731, and Onondaga, 1,319,958.

The crop of rye in 1874 was returned at 3,046,346 bushels, to which the largest contributors were: Columbia county, 521,155 bushels; Rensselaer, 251,797; Dutchess, 247,170; Albany, 221,024, and Ulster, 192,914.

The wheat crop of 1874 amounted in the aggregate to 10,188,067 bushels, grown upon 654,096 acres, to which the largest contributors were: Monroe county, 794,358 bushels; Ontario, 776,329; Cayuga, 727,338; Niagara, 657,822, and Wayne, 640,636.

The bean crop in 1874 amounted to 1,076,453 bushels, grown upon 81,321 acres. The area planted in 1875 was 78,641 acres. About half of the bean crop was contributed by the counties of Monroe and Orleans. Monroe's contribution was 258,933 bushels; Orleans, 250,604; Genesee, 86,757; Wyoming, 84,569; Livingston, 79,774.

The pea crop of 1874 amounted to 410,460 bushels, grown upon 22,384 acres. In 1875, 23,645 acres were planted. To the crop of 1874 the largest contributors were: Jefferson county, 88,350 bushels; St. Lawrence, 45,313; Steuben, 25,670; Allegany, 24,569, and Onondaga, 20,125.

The increase in the acreage of hops, from 1874 to 1875, was somewhat in proportion to the increased acreage of barley of those years; from 28,278 in 1874 to 37,004 in 1875, an increase of 8,726, or a little over thirty per cent. The crop in 1874 amounted to 13,846,065 pounds. Should the crop of 1875 have increased in proportion to the acreage, it should have amounted to something over sixteen millions of pounds. The largest contributors to the crop of 1874 were: Oneida, 3,101,958 pounds; Madison, 2,670,457; Otsego, 1,976,623; Schoharie, 1,495,329, and Franklin, 936,315. Otsego, which ranks third on this list, had the largest acreage in 1875, 7,560 against 5,919 in 1874.

The area devoted to potatoes in 1875 was 405,800 acres, an increase on 1874 of 47,367. The crop of 1874 amounted to 36,639,601 bushels, to which the following counties were the largest contributors: Washington, 2,468,528 bushels; Rensselaer, 1,702,643; Monroe, 1,681,964; St. Lawrence, 1,653,496; Oneida, 1,345,704.

There were but 402,530 square rods of land devoted to the growth of tobacco in 1875, against 414,850 in 1874. The crop of 1874 amounted to 3,118,075 pounds, more than a third of which, 1,501,355 pounds, were grown in the county of Onondaga; 485,104 pounds were grown in Che-

mung, 306,535 in Cayuga, 196,867 in Oswego, 185,030 in Steuben, and 122,993 in Dutchess. These six counties contribute considerably more than seven-eighths, of the whole crop, although tobacco was planted in 1875 in 37 counties of the State.

The number of apple trees in the State on the first of June, 1875, is returned at 18,278,636. The Apples and Cider. five counties having the largest number are Niagara, 1,128,274, Monroe, 1,013,863, Wayne, 800,517, Erie, 795,170, Orleans, 728,022. The product in fruit in 1874 was 23,118,230 bushels, to which the county of Wayne contributed 1,412,199 bushels, Westchester, 1,309,304, Monroe, 1,093,774, Niagara, 918,355, and Erie, 814,916. There were also manufactured the same year 536,131 barrels of cider, of which 26,316 were made in Westchester county, 23,530 in Erie, 21,355 in Monroe, 20,205 in Onondaga, and 17,775 in Oneida.

The vine in 1874 yielded 17,031,574 pounds of fruit, and 311,494 gallons of wine. The five coun- Grapes and Wine. ties contributing most largely of fruit were Steuben county, 4,235,726 pounds, Yates, 2,784,439 pounds, Ontario, 1,749,749 pounds, Chautauqua, 1,424,955 pounds, and Ulster, 1,003,011 pounds. The counties manufacturing the largest amount of wine in 1874 were Steuben, 73,500 gallons, Yates, 52,397, Monroe, 33,228, Ontario, 30,544, and Chautauqua, 24,044.

Maple Sugar and Syrup. The maple sugar crop of 1875 was returned at 9,272,702 pounds of sugar, and 240,023 gallons of syrup. The counties returning the largest amount of sugar were St. Lawrence, 1,469,867 pounds, Delaware, 855,393, Lewis, 585,644, Allegany, 555,242, and Jefferson, 529,414. The counties returning the largest amount of syrup were Delaware, 18,103 gallons, St. Lawrence, 13,497, Otsego, 12,631, Jefferson, 12,101, and Chautauqua, 11,608.

The honey collected in 1874 is returned at 1,469,318 pounds, to which the following five counties Honey. were the largest contributors: Steuben, 109,317 pounds, Onondaga, 77,336, Ontario, 69,179, Otsego, 56,862, and Cayuga, 47,448.

The entire number of horses returned on farms, including colts, June 1, 1875, was 594,052. Of Horses. these, 526,083 were two years old and upward; 67,969 were under two years. The five counties having the largest number of horses on farms, two years old and upward, were: St. Lawrence, 18,299; Erie, 17,357; Monroe, 17,091; Steuben, 16,119; Onondaga, 15,441.

Mules. The whole number of mules employed on farms, June 1, 1875, was 6,197.

Poultry and eggs. The value of poultry sold, in 1874, was \$1,772,084. The estimated value of the poultry owned, in 1875, was \$2,990,806. The value of eggs sold, \$2,513,144. The counties selling the largest amount of poultry were: Queens, \$88,403; Dutchess, \$77,188; Ontario, \$71,107; Suffolk, \$65,572; Onondaga, \$60,973. The counties selling the largest amount in value of eggs were: Suffolk, \$118,049; Erie, \$95,884; Onondaga, \$91,818; St. Lawrence, \$84,479; Cayuga, \$77,311.

Of neat cattle on farms on the first of June, 1875, there were 686,223 heifers, two years of age and Neat cattle. under, 129,325 bulls of all ages, and 94,806 working oxen and steers.

Of milch cows the average number kept in 1874 was 1,301,879, and in 1875, 1,339,816, an increase Milch cows. of 37,937. Of those kept in 1875, the following counties were the largest proprietors: St. Lawrence, 90,949; Jefferson, 60,876; Oneida, 59,947; Delaware, 50,142; Chautauqua, 50,080.

Cattle slaughtered. Of cattle slaughtered in 1874 there were but 85,571.

DAIRY PRODUCTS.

The milk of 422,831 milch cows, a little less than one-third of the whole number in the State in Milk. 1875, was sent to factories, an increase of 26,069 over the number in 1874.

Butter. Total amount of butter made in 1874 was 111,087,486 pounds.

The amount of butter made in families is returned at 107,873,361 pounds. Of this St. Lawrence contributed 8,546,746 pounds; Delaware, 6,816,793; Chautauqua, 4,956,715; Chenango, 4,751,542, and Jefferson, 4,253,429.

Cheese. The cheese product of the State in 1874 is returned at 98,725,172 pounds.

The cheese made in families during the year 1874, is returned at 7,778,413 pounds, to which the largest contributors were Herkimer, 1,940,367; Jefferson, 609,700; Chautauqua, 468,902; Oneida, 439,638; Onondaga, 420,731. It will be observed that about one-quarter of the whole was manufactured in Herkimer county.

Milk sold. In addition to the milk consumed upon the farms, 41,511,599 gallons were sold in the market. Of this the counties which contributed the largest proportion, and the only counties which contributed over a million of gallons, were Orange county, 13,530,709 gallons; Westchester, 5,244,867; Dutchess, 5,101,610; Putnam, 2,428,692; Queens, 1,960,502; Rensselaer, 1,799,057; Monroe, 1,162,335; Onondaga, 1,059,204.

SHEEP.

The number of sheep shorn in 1875 were 1,346,711, or 143,292 less than in 1874, and about half the number returned in 1855. The total clip of wool in 1875 amounted to 6,603,306 pounds. The total clip in 1874, 7,369,982 pounds, and the total clip in 1855, 9,331,202.

By these figures it appears that while the number of sheep has been reduced in the last twenty-five years, a little more than half, the product of wool is only reduced about one-third.

The counties clipping the largest amount of wool in 1875 were: Steuben, 393,020 pounds; Livingston, 381,933; Ontario, 360,551; Wayne, 317,616, and Genesee, 279,514. In 1855 Ontario produced 609,074 pounds; Livingston, 377,689, and Genesee, 352,003.

The counties cutting the largest number of fleeces in 1875 were: Steuben, 80,617; Livingston, 68,832; Washington, 63,359; Ontario, 60,219; Genesee, 47,779; Onondaga, 41,956; St. Lawrence, 41,405. All these counties cut fewer fleeces in 1875 than in 1855.

The only counties that report an increase since 1855 are: Warren, 11,546 in 1855 and 14,744 in 1875; Sullivan, 8,027 in 1855 and 9,596 in 1875; Hamilton, 1,048 in 1855 and 1,685 in 1875. These three counties, together with Essex, Lewis, Livingston and Rensselaer, are the only counties which report an increase in clip. The weight of fleece, however, is increased in every county.

Livingston, though it returned 106,839 fleeces in 1855 and only 68,832 in 1875, or 38,007 fleeces in 1855 more than in 1875, gives 4,244 pounds more wool in 1875 than in 1855. Its fleeces averaged in 1855, 3.53 pounds; in 1864, 4.40; in 1865, 4.22; in 1874, 5.55, and in 1875, 5.55. Thus with one-third less of fleeces it cuts more wool than it did twenty-five years ago. This is substantially the experience of every county in the State. Its explanation may be found partially at least in the fact that the farmers got rid of their poorer sheep and preserved the best, and have been gradually introducing a better stock of wool-growing sheep.

The money expended upon farm buildings justifies the presumption, too, that more attention has been given to proper housing of this kind of stock in winter than formerly.

Lambs The number of lambs dropped in 1875, 771,836, was 48,700 more than in 1874.

The number of sheep slaughtered in 1874 was 79,251, and the number killed by dogs 22,095. **Sheep killed by dogs.** Of the latter losses 1,213 fell upon the county of Steuben, 903 upon the county of Livingston, 852 upon the county of St. Lawrence, 813 upon the county of Essex, and 737 upon the county of Washington. Estimating each of these animals at \$3.50 per head, the cost of the dogs to the State, irrespective of what else they consumed, amounted to the sum of \$77,322.50.

SWINE.

The number of swine in 1875 were 960,393. The counties making the largest contributions to this aggregate in 1875 were Dutchess, 18,885, St. Lawrence, 17,723, Columbia, 15,446, Ulster, 14,969, Monroe,

14,865. Of the total number of swine in 1874, 521,490 were slaughtered on farms, and during the same year 121,184,622 pounds of pork were made on farms. Of this latter sum St. Lawrence contributed 4,895,412, Monroe, 3,926,933, Wayne, 3,904,330, Oneida, 3,763,404, and Onondaga, 3,770,211.

OCCUPATIONS.

That portion of the population of the State which represents its productive industry, numbers 1,537,726. They have been classified as far as practicable into 369 different categories.

Of the whole number, 1,275,372 are of the male sex, while of the females there are but 262,354, or about one-sixth, who have a profession or recognized business calling; 351,628 are engaged in agriculture, 422,805 in professional and personal service, 264,972 in trade and transportation, and 498,321 in manufactures, mechanics and mining. Of the female contingent, 128,334, or about half of all the

females having recognized business occupations, are employed as domestic servants. Manufactures, mechanics and mining give employment to 81,758 more, while 15,140 are employed as teachers of various kinds.

Of the whole number engaged in productive industry, 925,293 are natives of the United States, and 612,433 of foreign countries. Of the latter 189,424 are of German, and 275,505 of Irish origin.

PUBLIC INDEBTEDNESS.

The census of 1875 is the first in which an attempt has been made in this State to ascertain the amount of public indebtedness. The effort has been to obtain correct returns of every species of public debt, whether of the State, counties, cities or incorporated villages. These returns submitted are all derived from official sources.

The following table gives the aggregates of our public debt, together with the purposes for which in the main it was created :

	Sum of County debts, June 1, 1875.	State debt proper, Sept. 30, 1875.	Aggregate.		Sum of County debts, June 1, 1875.	State debt proper, Sept. 30, 1875.	Aggregate.
Aid of railroads.....	\$26,756,077		\$26,756,077	School buildings and school purposes, markets, fire department.	\$3,532,098		\$3,532,098
War and bounties	20,176,445	\$15,054,500	35,230,945	Other purposes, and indefinitely returned...	66,684,949	(a) \$13,274,186	79,959,135
Bridges, docks, high-ways, sewers, water supply	88,844,142		88,844,142	Total	\$244,079,859	\$28,328,686	\$272,408,545
Boulevards, cemeteries, parks and fair grounds	30,130,514		30,130,514	Sinking fund	32,508,855	13,581,382	46,090,237
Court-houses, jails, public offices, town halls	6,687,518		6,687,518	Debt less sinking fund	\$211,571,004	\$14,747,304	\$226,318,308
Alms-houses, asylums.	1,268,116		1,268,116				

The portion of the indebtedness chargeable upon the several counties will be found in the table on page 463.

In estimating the amount of this indebtedness it should be borne in mind that the assessed valuation of the taxable property of the State in 1875 was \$2,169,705,765.

Of the aggregate public indebtedness \$142,023,255, or more than half, is chargeable upon the county of New York. The assessed valuation of the taxable property in the county of New York was also more than half the taxable property of the State, \$1,129,291,023.

There is no county without a debt.

The five counties having the largest indebtedness after New York are : Kings county, \$42,044,821, Erie, \$6,407,140, Monroe, \$6,131,335, Albany, \$4,687,000, Westchester, \$3,690,344, and Ulster, \$3,039,341.

The counties having the largest indebtedness for railroads are : Oswego, \$2,014,112, Chenango, \$1,966,950, Ulster, \$1,444,941, Oneida, \$1,274,400, and Onondaga, \$1,223,000.

(a) General Fund, \$3,119,526; Contingent, \$68,000; Canal, \$10,086,660.

MANUFACTURES.

No compilation of the returns of manufactures has been made. After working upon them a few weeks Mr. Seaton found them so incomplete and inexact as to be worthless for statistical purposes, and upon his recommendation I directed their compilation to be abandoned.^(a)

(a) The following note from Mr. Seaton will explain his motives for this recommendation :

CENSUS BUREAU, April 25, 1877.

HON. JOHN BIGELOW, Secretary of State :

SIR—I am afraid the time we have spent on the returns of manufacturing establishments is lost. If you will cast your eye over the following table, showing the number of manufacturing establishments from which returns were received in 1870 and in 1875, respectively, I think you will agree with me in believing it scarcely worth while to prosecute the work any farther. The discrepancies between the returns of 1870 and 1875, discredit one or both.

The reduction in the number of establishments in the different counties of the State in the short period of five years, which is here exhibited, I will not say is improbable—it is impossible. There is nothing to confirm the revelation of this table that the number of manufacturing establishments in the State has fallen off 27 per cent.

The returns, too, on examination, have been found so defective as to make any study of them unprofitable. For example: Of the 890 returns from the two counties of Chemung and Otsego, 250 were taken at random, and of these, on examination, 82, or 33 per cent, were fatally defective; 53, or 21 per cent, were tolerably complete in form, but on analysis exhibited incredible business losses, leaving but 115, or 46 per cent, reasonably complete and apparently trustworthy.

In view of these facts I shall discontinue my work on these returns until farther orders.

Yours respectfully,

C. W. SEATON.

I am unwilling to close this imperfect abstract of the more important results developed in the following tables without allusion to the great inconvenience which both my predecessor and myself have experienced from the want of a properly organized bureau for this species of statistical labor.

The taking of a census and digesting its returns are duties which require special training and considerable practical experience. When the enumeration of 1875 was instituted this office was practically destitute of either, and when the compilation was commenced its equipment for such work was equally defective. I see no remedy for this except in the organization of a census or statistical bureau in the office of the Secretary of State, permanent in its character, the head of which should be trained and experienced in this kind of work, and whose duty it should also be to secure to the State the benefit of every improvement which is made in any department of statistical science. Such an officer would preserve the traditions of the bureau; he would soon by way of exchange and with only a trifling expense, surround himself with an ample but indispensable collection of books for reference and comparison, and by timely preparation and forecast would be able to give the results of the census to the public at least a year earlier than is practicable under the present system. It is with the census as with charity, "He gives twice who gives quickly." The returns lose somewhat of their value every day that elapses after they are received.

To such a bureau might also be added the compilation and digestion of the criminal and poor law statistics, which, in competent hands, might be made as useful as they are now worthless.

The difference in expense to the State of such a statistical bureau need only be the difference between the salary of an ordinary clerk and that of an expert — a matter of five hundred or a thousand dollars a year.

The census of this State, however, will never be quite what it should be for its cost, nor respond to the just expectations from a State which, within a quarter of a century, in all human probability, will have a population nearly, if not quite equal, to that of the British Empire in the days of Shakespeare and Bacon, unless some more adequate and systematic provision is made for competent, trained and faithful enumerators. The more accurately and skillfully the returns are digested the more seriously will they mislead if the returns of the enumerators are not trustworthy.

In view of the defects of our present system of selecting enumerators I will venture to record here a suggestion, which has been made to me by Mr. Seaton on this subject, and which seems to be worthy of serious consideration. It is, that the Secretary of State be authorized to request any of the teachers of district schools, or any other schools receiving aid from the State, without distinction of sex, to report to him in the winter of every year the amount harvested of the principal agricultural products of the State; such, for example, as the leading cereals, hay, butter, cheese, and fruit and root crops. This information is needed every year, and, for comparative purposes, would add greatly to the value of the quinquennial censuses, which are now taken.

Although there should be no compensation attached to this work, nor any cost to the State, except for the blanks and postage consumed in procuring the returns, I do not permit myself to doubt that the duty would be accepted and discharged by the persons who should be selected for the purpose, not only with alacrity, but with a thoroughness and fidelity, which cannot be expected from enumerators selected, more or less, at hazard, and often without any special knowledge of the people or the industries on which they report.

The collecting and arranging of these returns might be included among the recreations and rewards of merit of the more faithful pupils, and would furnish excellent opportunities for a practical application of their scholastic studies.

Precious as would be the information thus obtained to a State like New York, the larger part of which is consecrated to agricultural industries, I should not think this a suitable place to refer to or commend the above suggestion, but for an incidental and consequent advantage which the State would

derive from it in future census enumerations. Here would be a class of presumptively more than average education and of a rather higher than average moral character, from among whom could always be selected enumerators specially trained, and not at the expense of the State, for this business. The chance of their being selected would be to each one an inducement to extra exertion and thoroughness in making his annual returns, and the compensation they would receive would make them feel that the time annually expended in this duty was not wasted. A glance at the agricultural statistics in this volume will satisfy any intelligent reader that an annual digest of what the land of the State from season to season yields to the solicitations of the husbandman would be a record of incalculable interest and value. This is not the place, nor indeed can it now be necessary to explain, how the range of these inquiries might in time be extended to the mining and manufacturing industries of the State, about which it is important to have frequent and accurate information. It is enough to suggest the method, which once put in operation would rapidly take the shape best adapted to the wants of the country.

JOHN BIGELOW,
Secretary of State.

TABLES.

CENSUS OF NEW YORK FOR THE YEAR 1875.

TABLE NO. 1—AGGREGATE POPULATION (a) of New York, by Counties, at EACH of the CENSUSES from 1790 to 1875.

(a) In this table are classed as "Urban and Suburban," 1st. Cities. 2d. Towns adjacent to Cities having a population of 20,000 and upwards. 3d. Towns which contain Villages having a population of 1,000 and upwards. The Village population could in no other way be taken into the account, as in a large majority of instances the population of Villages could not be determined from the returns of the Census of 1875. 4th. Towns whose areas have, in the interval, been changed by the annexation of portions of their territory to other civil divisions, which are themselves classed as Urban. This inclusion was necessary to eliminate increase or decrease of population due to change of area. Civil Divisions, which have thus interchanged area, appear together in the table and are connected by a brace. The changes of area are fully explained in Table 14. (b) Adjacent to the City of Albany. (c) Containing the villages of Green Island and West Troy. (d) Containing village of same name. (e) Containing village of Weedsport. (f) Containing village of Port Byron. (g) Containing village of Union Springs. (h) Containing village of Jamestown. (i) Containing village of Fredonia. (j) Adjacent to the City of Elmira. (k) Containing village of Keeseville. (l) Containing village of Ausable Forks. (m) Containing villages of Champlain and Rouses Point. (n) Containing villages of Kinderhook and Valatie. (o) Containing village of Cortland.

(a) The great discrepancies which appear when the figures for the German States and for Germany, N. S., for 1875, are contrasted with those for 1872, are due to the great emphasis with which the enumerators, in 1870, were enjoined to ask in what German States, the Germans enumerated were born.

TABLE 22.—Showing for each County, and for the State, how many of the inhabitants of New York, at the Census of 1875, WERE BORN IN EACH COUNTY OF NEW YORK, IN EACH STATE AND TERRITORY OF THE UNITED STATES, AND IN EACH SPECIFIED FOREIGN COUNTRY.—Continued.

N. B.—In this class "Under 3 acres," the content is different at the two censuses; at the census of 1870 the instructions were: "No farms under 3 acres will be reported unless \$500 worth of produce has actually been sold off from it during the year."

TABLE 59—INCREASE or DECREASE in the NUMBER OF FARMS of each Class, during the interval between the Censuses of 1870 and 1875, by Counties.

Civil Divisions.	INCREASE IN NUMBER OF FARMS BY CLASSES, 1870-1875.									DECREASE IN NUMBER OF FARMS BY CLASSES, 1870-1875.								
	Of all sizes.	Under 3 acres.	3 and under 10.	10 and under 20.	20 and under 50.	50 and under 100.	100 and under 500.	500 and under 1,000.	1,000 and over.	Of all sizes.	Under 3 acres.	3 and under 10.	10 and under 20.	20 and under 50.	50 and under 100.	100 and under 500.	500 and under 1,000.	1,000 and over.

N. B.—In this class "Under 3 acres," the content is different at the two censuses; at the census of 1870 the instructions were: "No farms under 3 acres will be reported unless \$500 worth of produce has actually been sold off from it during the year."

TABLE 60 — Showing, by Counties and Towns, for the years 1855, 1864, 1865, 1874 and 1875, the

TABLE 64—Increase Per Cent in Acreage, Crops, &c., from 1865 to 1875.

Acres of Improved Land.....	7.07	Area of Spring Wheat, acres.....	—15.11	Pounds of Maple Sugar made.....	—3.76
Acres of Unimproved Land.....	—6.03	Bushels of Spring Wheat produced	46.26	Gallons of Maple Syrup made.....	72.06
Value of Farms.....	32.72	Area of Winter Wheat, acres.....	39.55	Pounds of Honey produced.....	—23.13
Value of Stock.....	15.29	Bushels of Winter Wheat produced	66.00	Number of Horses (a).....	—1.54
Value of Tools and Implements...	108.81	Area of Beans, acres.....	31.54	Number of Mules (a).....	19.89
Cost of Fertilizers.....	110.67	Bushels of Beans produced.....	18.88	Value of Poultry owned (a).....	60.90
Area of Plowed Land.....	18.32	Area of Peas, acres.....	—51.76	Value of Poultry sold.....	44.30
Area of Pasture Land.....	3.55	Bushels of Peas produced.....	—29.33	Value of Eggs sold.....	92.87
Area of Mown Land.....	13.21	Area of Hops, acres.....	16.19	Number of Neat Cattle (a).....	5.97
Tons of Hay produced.....	39.58	Pounds of Hops produced.....	13.05	Number of Milch Cows (a).....	8.90
Bushels Grass Seed produced.....	99.34	Area of Potatoes, acres.....	52.49	*Number of Cattle slaughtered (a)	—61.36
Area of Barley, acres.....	11.92	Bushels of Potatoes produced.....	57.68	Pounds of Butter made in families	27.54
Bushels of Barley produced.....	57.07	Square Rods of Tobacco planted..	—80.03	Gallons of Milk sold in market...	40.09
Area of Buckwheat, acres.....	9.77	Pounds of Tobacco produced.....	—76.17	Number of Sheep shorn.....	—60.81
Bushels of Buckwheat produced..	14.52	Number of Apple Trees.....	86.34	Pounds of Wool clipped.....	—53.38
Area of Indian Corn, acres.....	—0.71	Bushels of Apples produced.....	42.06	Lambs raised.....	—54.11
Bushels of Indian Corn produced.	12.86	Barrels of Cider made.....	36.99	Number of Sheep slaughtered (a)	—66.90
Area of Oats, acres.....	19.65	Pounds of Grapes produced.....		Number of Sheep killed by dogs..	—4.74
Bushels of Oats produced.....	99.28	Gallons of Wine made.....	345.25	Number of Swine (a).....	—10.85
Area of Rye, acres.....	9.83			Number slaughtered on farms...	—26.21
Bushels of Rye produced.....	18.29			Pounds of Pork made on farms...	—5.67

(a) On Farms.

*Slaughter Houses included in some cases in census of 1865.

TABLE 65—Showing by counties the AVERAGE YIELD PER ACRE in New York, in 1874, of the principal crops.

Civil Divisions.	AVERAGE YIELD PER ACRE.									
	Hay.	Barley.	Buckwheat.	Indian Corn.	Oats.	Rye.	Spring Wheat.	Winter Wheat.	Hops.	Potatoes.
	Tons.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Bushels.	Pounds.	Bushels.
